CREATING A GREAT USER EXPERIENCE FOR MOBILE APPS

Dharmendra Sharma

Designing Experiences, Not Just Apps
Jaipur, Rajasthan, India

Summary

With over 13+ years of experience, I specialise in creating digital solutions for industries such as logistics, hospitality, marketing research, and transportation services.

Dedicated and passionate about my work, I am driven by a continuous quest for learning and improvement.

My specialties include a strong willingness to learn coupled with enthusiasm, a focus on achieving results, adherence to efficient processes, self-motivation, teamwork, unwavering commitment, the ability to handle tasks or projects independently, and proficiency in working effectively under tight deadlines.

Experience

Mahindra Logistics
6 years 11 months

Manager
August 2024 - Present (2 years 3 months)
Gurugram, Haryana, India

In my current role, I develop innovative applications designed to enhance mobility and productivity. I spearhead the development of a people transportation system application to improve mobility and a warehouse management system aimed at boosting productivity and efficiency. Additionally, I helping the Android and iOS mobile development teams, ensuring seamless integration and optimal performance across platforms. My focus is on creating cutting-edge solutions that streamline operations and elevate user experiences.

Deputy Manager
December 2019 - July 2024 (4 years 8 months)
Gurugram, Haryana, India

I develop innovative applications designed to enhance mobility and productivity.

Tangish
Mobile Application Developer
September 2019 - November 2019 (3 months)
Gurugram, Haryana, India

I led the development of a comprehensive Android and iOS application for organization-wide project, task, and team management. Collaborating closely with my team, I spearheaded the implementation of new features and ensured timely deployment by building and publishing applications on both the Play Store and App Store platforms.

Unomer
Mobile Application Developer
July 2018 - August 2019 (1 year 2 months)
Greater Jaipur Area

Engaged in leveraging Android SDK and iOS framework for conducting mobile in-app market research initiatives. My role encompasses building and seamlessly integrating our SDK with diverse applications. Additionally, I oversee the continuous enhancement and maintenance of the SDK code to align with the latest updates in Android and iOS versions.

Alleviate Technologies Pvt Ltd
Mobile Application Developer
March 2016 - June 2018 (2 years 4 months)
Jaipur

Engage in cross-functional collaboration to analyse, design, and deploy new features. Manage the end-to-end process of building and publishing applications on app and play stores. Continually explore and integrate new technologies to optimize application performance and enhance user experiences.

RG Web Studio
Senior Android Developer
April 2015 - February 2016 (11 months)
Jaipur

Developing applications tailored to meet client requirements, ensuring alignment with project objectives. Collaborating with project leaders and Delivery Managers to provide accurate estimates for the implementation of new features. Additionally, responsible for maintaining and enhancing applications and services, including prompt resolution of bug.

nibble MATRIX Technologies Pvt. Ltd.

Associate Software Engineer

August 2013 - March 2015 (1 year 8 months)

Bangalore

I contributed to the development of eBill, an online food ordering system (Point of Sale), focusing on the Client app and billing system components. My role included overseeing critical logic and algorithms crucial for seamless integration with other systems, ensuring optimal functionality and performance.

Indian Institude of Hardware Technology(IIHT)

Trainee

March 2012 - September 2012 (7 months)

Jaipur Area, India

6 month training experience in C#,ADO.NET,Console Application,Window Application and Web Application.
